DETAILED ACTION

This application was filed 11/10/2004 and is a 371 of PCT/IT03/00011 (1/15/2003) which claims priority to Italy RM02 A 000014 (1/15/2002). Claims 1-7 are before the Examiner and are subject to the following lack of unity of invention.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-7 (in part), drawn to compounds, compositions and methods of treatment wherein X is indolyl or carbazol-9-yl, with an election of a single disclosed species.

Group 2, claim(s) 1-7 (in part), drawn to compounds, compositions and methods of treatment wherein Z=O, m=1, n=p=0, R=H and R1=R2=H or alkyl, with an election of a single disclosed species.

Group 3, claim(s) 1-7 (in part), drawn to compounds, compositions and methods of treatment wherein R1=R2=H or alkyl, m=0, n=0-3, R=phenyl or naphthyl and Q=O or OC(O)NH, with an election of a single disclosed species.

Group 4, claim(s) 1-7 (in part), drawn to compounds, compositions and methods of treatment of formula (I) other than encompassed by the above groups 1-3, with an election of a single disclosed species for further possible restriction.

2. The inventions listed as Groups 1-4 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or

corresponding special technical features for the following reasons: The special technical feature that all the above groups share is a phenyl ring. Elangbam teaches PPAR γ receptor mediators having a phenyl ring. Thus the corresponding technical feature is not applicant's contribution to the known art.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
